

IN and OUT Conditions Matching up for...

[Jay Bauerlein](#) 3 posts since

Mar 31, 2009 I have jobA coming into the que at 07:00 and running at 00:01 the next day. JobB then comes into the que at 07:00 and wait on jobA 's completion. How do i get the IN and OUT Conditions to match so jobB knows the jobA completed. Both jobs run only once a month on offerent calendars. I tried ODAT and PREV in the IN Condition but that does not work. We are using version 6.3

Hi Jay,

Take a look at the manuals that refer to STAT conditions.
