

Plugins usage details description Document

It would be nice to get more info about the available plugins. As described in Discussion:
[Remedy Plugins - Usage Description](#)

This plugin usage and functionality is easy to understand:

▼ **Set Fields**

Data Source:

Server Name:

Plugin Name: ...

| Position | Value | Type |
|----------|--------------|-------|
| 1 | \$HTMLBody\$ | Field |
| | | |
| | | |

| Field | Value |
|--|-------|
| <input type="checkbox"/> Plain Text Body | \$1\$ |

But what about the others? :

[List of BMC Remedy Plugins](#)

It would be nice to get this documented. Lot of them can be really useful for different customizations...

...this should be also in Place - Remedy ITSM but I cannot choose two places...
