

Bulk Creation of Case for New Employee Onboarding Checklist

Now, Case only be manual created by HR agent, when too many New Employee Onboarding, this is a very complicated job.

We can customize by "COL: CASE: Case_Interface_Create" form for bulk creation, but the personal information of each employee is different, so we need to edit the data in an Excel file first, then to import the file to the form. (through AI Spoon or AR Data Import tool)

So, we should be design this function in the HR Case Management, and provide a new import interface.
