

# have "send manual event" available in TSPS

---

hi,

in TSIM there is the option to manually trigger events, which is very useful for testing and so on, this is for sure missing in TSPS event view and needs to be added

have "send manual event" available in TSPS

### Send Manual Event(s) ✕

Target Cell	<input type="text" value="pncell_vie-vm-291"/>
Copies to Send	<input type="text" value="1"/> ( 500 max )
Wait Between Sends	<input type="text" value="0.2"/> Seconds ( 120 max )
Severity	<input type="text" value="Critical"/>
Priority	<input type="text" value="1 - Highest"/>
Message	<input type="text"/>

---

#### Optional Slots

Note: If slot values are entered in an incorrect format, the cell may reject the event.

Class	<input type="text" value="Event"/>
Category	<input type="text"/>
Component Alias	<input type="text"/>
Component ID	<input type="text"/>
Host	<input type="text"/>

cheers

have "send manual event" available in TSPS
