

The problem ...

You would like to represent master/detail or 1:M relationships within a FootPrints Ticket...

Examples of such applications include Expense claims, Purchase requests or bulk account requests...

And you wish to show up these details information on the FootPrints ticket instead of an attachment

Inoks Embedded Grid for FootPrints

- An add on built by Inok Systems for a FootPrints customer deployment
- Comprises javascripts, database tables and triggers
- Data cells in grids are configurable

inok systems

PRODUCT	QTY	PRICE	REMARK	DELIVERY DATE	LINE TOTAL	ACTION
